PHASE ACTIVITIES

✓ Montenegrin partners' meeting

The representatives of the Chamber of Economy of Montenegro held a meeting on 20 January with the representatives of the Institute for Public Health of Montenegro (IPH) regarding telemedicine project activities.

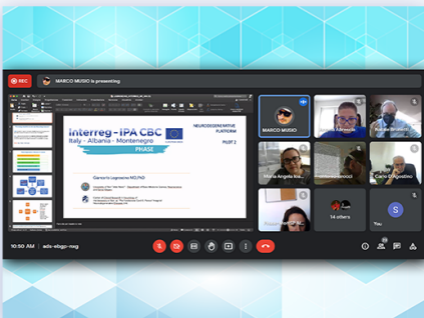

They informed each other on current projects implemented through different EU programmes, including PHASE, as well as the IPH's project of the development of telemedicine platform for primary health services in Montenegro through the support provided by the Central European Initiative.

IPPC is implementing two more projects **ERI health** and **ON TIME**.

✓ Project partners' meeting held online

An online meeting of PHASE project partners was held on 26 January 2022. After the introductory words and the presentation of the new members of the partners' project team, the partners discussed more on the dynamics of project implementation. The Lead Partner **Politecnico di Bari** presented a plan of future activities with a special focus on pilot activities.

✓ Innovation and Modern Technologies in the Health Care Conference

The Montenegrin Association for Medical Informatics MAMI and the Chamber of Economy of Montenegro, as the project implementers of the PHASE (CBC Interreg Italy-Albania-Montenegro) and DigNest (Erasmus+) projects, will co-host a conference titled "Innovation and Modern Technologies in Health Care" on May 12, 2022, at the Hotel Hilton in Podgorica.

The Conference will focus on presenting the most recent advances in medical and healthcare technology at the European and worldwide levels. Furthermore, a large portion of the Conference will be devoted to a discussion of the current difficulties confronting the healthcare sector, as well as the potential of introducing and integrating contemporary and innovative technology in certain fields of medicine in Montenegro.

In addition to local experts in medicine and technology, the Conference will feature new experts from Greece, Romania, and Germany, who will share their experiences in the development of medical informatics in other regions of Europe with the attendees.
